

Assignment-1

Q1) package com.example.domain;

public class Employee {

public int Employee-id;

public String Employee-name;

public String social-security-number;

public double Employee-salary;

public Employee-salary;

public Employee() {

super();

}

// getters and setters.

⇒ next class: -

package com.example;

import com.example.domain.*;

public class EmployeeTest {

public static void main (String [] args) {

Employee e = new Employee();

e.setEmployee-id (101);

e.setEmployee-name ("Tane smrk");

e.set social-security-number ("012-34-567");

e.setEmployee-salary (120-345-27);
