Environment

1.Explain design for the environment concept . explain with example why environment needs to be considered by todays leaders

There is no escaping the fact that responding to climate change is now a global priority for all governments, businesses, and organizations. The global ability to develop and deploy environmental leaders into societal beneficial roles within public and private organizations must now be a priority in our response. There is a great need for a heightened focus on environmental business management. leaders out there holding down responsible posts in business, political, and public leadership. Their work focuses on a wide variety of environmental policy and management issues, single-issue activism, the regulation of licensed activities, and service provision.

The environment around us is an essential part of human survival. I like to believe that people who do not care about the environment, simply do not understand how important it is to all of us and that it does not affect them directly, these are my reasons you should be concerned about the environment.

A Clean Environment Is Essential for Healthy Living: The more you don't care about our environment, the more it will become polluted with contaminants and toxins that have a harmful impact on our health. Air pollution can cause respiratory diseases and cancer, among other problems and diseases.

Earth Is Warming: For the sake of our children and our future, we must do more to combat climate change. Yes, it's true that no single event makes a trend. Now it is not possible to ignore that.

Biodiversity Is Important: Biodiversity refers to the variety of plants, animals, and other living things in our world. it can be negatively influenced by habitat loss and degradation due to human activity, climate change, and pollution, among other things.
